SUMMARY

Meteorology and Climate Science graduate with strong quantitative expertise in atmospheric and oceanic data analysis, climate variability, and Earth system processes. Experienced in processing and analysing Earth observation, reanalysis, and environmental datasets using Python-based scientific workflows to investigate sea surface temperature variability, ocean-atmosphere interactions, regional climate dynamics, and environmental change. Skilled in statistical analysis, geospatial modelling, machine learning applications, and scientific visualization using Python, ArcGIS, CDO, and PyFerret. Research interests include climate dynamics, ocean-atmosphere interactions, atmospheric composition, geophysical fluid processes, climate variability, and the application of observational and modelling approaches to understanding regional and global climate systems.

RESEARCH INTEREST

- Atmospheric Physics
- Earth System Science
- Remote Sensing and Earth Observation
- Ocean-Atmosphere Interactions
- Regional Climate Modelling
- Climate Dynamics and Variability
- Geophysical Fluid Dynamics
- Machine Learning Applications
- Atmospheric Composition and Air Quality

RESEARCH EXPERIENCE

Comparison of Sea Surface Temperature over Gulf of Guinea During Dry and Wet Year Composites of West Africa (2024) <https://doi.org/10.5281/zenodo.20156058>

- Analyzed SST variability: interannual and seasonal SST patterns and their correlation with regional climate indices. Produced anomaly maps and time-series visualizations using Python, Climate Data Operators (CDO), and NOAA datasets.

Spatio - Temporal Analysis of Flood and Its Risk in Lokoja, Kogi State, Nigeria (Case Study of 2012, 2022 Flood in Lokoja) <https://doi.org/10.5281/zenodo.17830079>

- Conducted rainfall variability, land cover analysis, flood risk maps and vulnerability assessments using remote sensing data (Landsat TM/ETM+, QuickBird) and DEM-based hydrological modeling.

Climate-Ecological Stress in a Rapidly Urbanising Tropical Savanna: A Decade of Satellite-Based Evidence from Oyo State, Nigeria (2015-2025). <https://doi.org/10.5281/zenodo.20325434>

- Analyzed long-term Sentinel and MODIS datasets (CO, NO₂, CH₄, O₃) alongside NDVI and LST indices to quantify, ecosystem quality, vegetation decline and urban heat island dynamics using python-based geospatial analysis and ArcGIS tools: The Climatic framework was submitted to the Oyo State Government for policy implemetation 2025

FIELD AND TECHNICAL EXPERIENCE

Intern, Nigerian Navy Hydrographic Office | Lagos, Nigeria **Dec 2022 - May 2023**

- Assisted in hydrographic survey planning, data interpretation, and nautical chart production for coastal navigation.
- Gained hands-on experience in remote-sensing data handling, spatial referencing, and map compilation for marine environments.

Field Researcher - Idanre Hill Meteorological Field Study **2021**

- Participated in environmental fieldwork involving on-site meteorological data collection, surface-temperature measurement, and terrain-microclimate analysis.

VOLUNTEERING AND TRAINING

- **Lead Green Fellowship Programme 2026**
Team Lead - Sustainable Urban Group
- **NGYouthSDGs**
Member - Climate Voices Bootcamp 2026
- **UN Environmental Programme**
Member - Children and Youth Major Group

PROFESSIONAL EXPERIENCE

- IT Instructor

Oct, 2025 - Present
- Sidmach Technologies Nigeria Limited, Ede, Osun State Nigeria
- Deliver training in Microsoft 365 productivity tools, data analytics, and IT fundamentals to Adeleke University students and staffs.

• Assist in implementing Microsoft Imagine Academy curriculum and help learners earn global IT certifications.
- NYSC | Physics and Mathematics Teacher

July 2024 - June 2025
- Ojoo High School, Alaka, Ibadan, Oyo State
- Delivered comprehensive lessons in Physics for Senior secondary school 1 and 2, and Mathematics for Junior Secondary school 3, aligned with the national curriculum.

• Prepared students for internal examinations and fostered a strong foundation in science education

EDUCATION

- Bachelor of Technology in Meteorology and Climate Science | 2024
- Federal University of Technology, Akure, Nigeria - Second Class Upper - CGPA 4.14/5.0
- Relevant coursework in World Climatology, Boundary Layer Meteorology, Satellite Meteorology, Micro-Meteorology, Atmospheric Dynamics, Climate and Society, Physics of The Earth, Fluid Dynamics, Atmospheric Thermodynamic, Dynamical Oceanography and Air-Sea Interaction...
- Undergraduate Thesis: Comparison of Sea Surface Temperature over Gulf of Guinea During Dry and Wet Year Composites of West Africa.

CERTIFICATIONS

- Applied Data Science

WorldQuant University
- Microsoft Office Specialist
- Hydrographic Survey

International Hydrographic Organisation

TECHNICAL SKILLS

Programming & Data Analysis | Python (NumPy, Pandas, Matplotlib, xarray) | R (basic) | Microsoft Office Suite (Expert) | Pyferret (advanced) | ArcGIS (Advanced) | Machine Learning (scikit-learn, TensorFlow/PyTorch).

PROFESSIONAL SKILLS

Project Management | Leadership | Public Speaking | Communication | Adaptability | Time Management

LEADERSHIP SKILLS

- Parliamentary President

Nigerian Association of Earth and Mineral Sciences Parliamentary Council, FUTA

2020 - 2022
- Chief Whip

Nigerian Association of Earth and Mineral Sciences Parliamentary Council, FUTA

2017 - 2018
- Senior Special Assistant on Media and Publicity

Office of The Financial Secretary - National Association of Nigerian Students

2021 - 2022

AWARDS

- Parliamentary Man of the Year - NISOMS, FUTA, 2022,
- Award of Excellence in Analytical Innovation - NISOMS, FUTA, 2022,
- Faculty Speaker of the Year - NAEMSS, FUTA, 2022
